ASSIGNMENT

WHEREAS, I, WEI WEN CAI, a citizen of China, residing in Pearland, Texas, (herein called "Assignor") am one of the inventors of a certain new and useful invention entitled "COMPOSITIONS AND METHODS FOR ARRAY-BASED GENOMIC NUCLEIC ACID ANALYSIS OF BIOLOGICAL MOLECULES" (herein called the "Invention"); and

WHEREAS, Assignor is an employee (herein called "College Personnel") of BAYLOR COLLEGE OF MEDICINE, a non-profit corporation duly organized and existing under and by virtue of the laws of the State of Texas, and having a principal place of business at Texas Medical Center, One Baylor Plaza, Houston, Texas 77030 (herein called "Assignee");

WHEREAS, Assignor represents that he is one of the inventors of the Invention and that the Invention was made, conceived and/or reduced to practice while Assignor was serving in their positions as College Personnel of Assignee;

WHEREAS, Assignee is desirous of acquiring and Assignor is desirous of assigning to Assignee all rights to said Invention under the terms and provisions of the policy on Inventions and Patents adopted by the Board of Trustees of Baylor College of Medicine ("Baylor's Patent Policy");

WHEREAS, this assignment is preparatory to a contemplated further licensing by Assignee of the Invention to a corporation or other entity for commercialization of the Invention;

WHEREAS, Assignor acknowledges that he is assigning his right as part of his obligations as College Personnel, his use of the facilities of Assignee to make the Invention and his desire to receive consideration under the Baylor Patent Policy;

NOW, THEREFORE, Assignor, for and in consideration of the benefits to be accorded including payments to be made to, or equity to be received by, Assignor under Baylor's Patent Policy and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, does hereby SELL, ASSIGN and CONVEY unto Assignee, under the terms and conditions of Baylor's Patent Policy all of Assignor's rights throughout the world in and to:

1. Said Invention;
2. United States of America patent application on said Invention filed concurrently;
3. All applications for patent or like protection on said Invention that have now been or may in the future be filed by Assignors or their legal representatives, whether in the United States of America or any other country or place anywhere in the world;

any other country or place anywhere in the world.

5. All substitutions for and divisions, continuations, renewals, reissues, extension, and the like of said applications and patents and like grants, including without limitation, those obtained or permissible under past, present and future law or statutes;

6. All rights of action on account of past, present and future unauthorized use of said Invention and for infringement of said patents and like protection;

7. The right to Assignee to file in its name applications for patents and like protection for said Invention in any country or countries foreign to the United States; and

8. All international rights or priority associated with said Invention, applications, patents and like protection.

Assignor covenants that Assignor, his heirs, legal representatives, assigns, administrators, and executors will, at the expense of Assignee, its successors and assigns, execute all papers and perform such other acts as may be reasonably necessary to give Assignee, its successors and assigns, the full benefit of this Assignment.

This assignment of the Invention is intended to be part of an integrated plan to transfer by means of license or otherwise the Invention to a corporation or other entity for commercialization of the Invention pursuant to the terms of the Baylor Patent Policy. All payments made to, or equity received by, Assignor from any corporation or other entity commercializing the Invention shall be in exchange for Assignor's assignment of the Invention hereunder and pursuant to Assignor's rights under the Baylor Patent Policy.

The U.S. Commissioner of Patents and Trademarks is hereby requested to issue U.S. Letters Patent in accordance with this Assignment.

The Patent Offices throughout the world are requested to issue Letters Patent in accordance with this Assignment.

ASSIGNMENT

WHEREAS, I, Allan Bradley, Ph.D., (herein called "Inventor") am the inventor of a certain new and useful invention entitled "COMPOSITIONS AND METHODS FOR ARRAY-BASED GENOMIC NULCEIC ACID ANALYSIS OF BIOLOGICAL MOLECULES" (herein called the "Invention"); and

WHEREAS, at the time of the Invention, Inventor was an employee of the Howard Hughes Medical Institute, a Delaware corporation having a principal place of business at 4000 Jones Bridge Road, Chevy Chase, MD 20815-6789 (herein called "Institute") working at BAYLOR COLLEGE OF MEDICINE, a non-profit corporation duly organized and existing under and by virtue of the laws of the State of Texas, and having a principal place of business at Texas Medical Center, One Baylor Plaza, Houston, Texas 77030 (herein called "Baylor");

WHEREAS, Inventor represents that he and Wei Wen Cai are the sole and only inventors of the Invention and that the Invention was made, conceived and/or reduced to practice while Inventor was serving in his position at Institute;

WHEREAS, Baylor is desirous of acquiring and Inventor and Institute are desirous of assigning to Baylor all rights to said Invention under the terms and provisions of the policy on Inventions and Patents adopted by the Board of Trustees of Baylor College of Medicine ("Baylor's Patent Policy") and under the terms and provisions of that certain Agreement between Baylor and Institute dated as of November 11, 1986, (the "Collaboration Agreement");

WHEREAS, this assignment is preparatory to a contemplated further licensing by Baylor of the Invention to a corporation or other entity for commercialization of the Invention.

WHEREAS, Inventor acknowledges that he is assigning his right as part of his obligations as employee of Institute and Institute acknowledges that it is assigning its right as part of the Collaboration Agreement.

NOW, THEREFORE, Inventor, for and in consideration of the benefits to be accorded including payments to be made to, or equity to be received by, Inventor under Baylor's Patent Policy and for other good and valuable consideration, the receipt and sufficiency of which is

1. Said Invention;
2. United States of America patent application on said Invention filed concurrently;
3. All applications for patent or like protection on said Invention that have now been or may in the future be filed by Inventor or his legal representatives, whether in the United States of America or any other country or place anywhere in the world;
4. All patents and like protection that have now been or may in the future be granted on said Invention to Inventor or his legal representatives, whether in the United States of America or in any other country or place anywhere in the world;
5. All substitutions for and divisions, continuations, renewals, reissues, extension and the like of said applications and patents and like grants, including without limitation, those obtained or permissible under past, present and future law or statutes;
6. All rights of action on account of past, present and future unauthorized use of said Invention and for infringement of said patents and like protection;
7. The right to Baylor to file in its name applications for patents and like protection for said Invention in any country or countries foreign to the United States; and
8. All international rights or priority associated with said Invention, applications, patents and like protection. (collectively the rights in paragraphs 1 through 8 are herein called "Assigned Rights")

NOW, THEREFORE, Institute, for and in consideration of the benefits to be accorded including payments to be made to, or equity to be received by, Institute under the Collaboration Agreement and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, does hereby SELL, ASSIGN and CONVEY unto Baylor, under the terms and conditions of the Collaboration Agreement all of Institute's rights throughout the world in and to the Assigned Rights.

Each of Inventor and Institute covenant that each and, their heirs, legal representatives, assigns, administrators, and executors will, at the expense of Baylor, its successors and assigns, execute all papers and perform such other acts as may be reasonably necessary to give Baylor, its successors and assigns, the full benefit of this Assignment.

This assignment of the Invention is intended to be part of an integrated plan to transfer by means of license or otherwise the Invention to a corporation or other entity for further development and commercialization.

Inventor and Institute's assignment of the Invention hereunder and pursuant to rights under the Baylor Patent Policy and the Collaboration Agreement.

The U.S. Commissioner of Patents and Trademarks is hereby requested to issue U.S. Letters Patent in accordance with this Assignment.

The Patent Offices throughout the world are requested to issue Letters Patent in accordance with this Assignment.
